L70-R, a low cost ROM-based GPS module, brings the high performance of MTK positioning engine to the industrial applications with compact profile, ultra low power consumption and fast positioning capability.

With advanced AlwaysLocate™ technology, L70-R achieves the low consumption and fully meets the industrial standard. AlwaysLocate™ technology allows L70-R to adaptively adjust the on/off time to achieve balance between positioning accuracy and power consumption according to the environmental and motion conditions.

Additional feature of embedded logger function called LOCUS allows L70-R to log position information to internal NVRAM. Based on internal 8KB NVRAM, L70-R can record around 500 events of logging data without adding cost.

With its tiny design, high precision and sensitivity, L70-R is perfectly suitable for a broad range of M2M applications such as portable device, automotive, personal tracking, security and industrial PDA.
